

Sergio Andres Penagos Posada

Career Summary

Software Engineer with over 8 years of experience developing scalable, responsive, and accessible web applications for national and international clients. I specialize in modern frontend development using **React**, **Next.js**, **Vue**, **TypeScript**, and **Design Systems**, with experience building reusable component libraries using **Storybook** and contributing to large-scale application migrations. I have led development teams, collaborated with cross-functional international teams, and delivered high-quality software aligned with business objectives. My experience also includes **Node.js**, **Laravel**, **AWS**, **Module Federation**, and **modern frontend architectures**. I hold Associate Degrees in **Software Analysis and Development** and I am currently completing the final requirements for my **Bachelor's Degree in Software Engineering**. I am passionate about writing maintainable, reusable, and production-ready code while continuously learning new technologies to solve complex business challenges.

Proficient in:

- | | | |
|---------------------|--------------------------------|---------------------------|
| • React | • Scss | • GitHub |
| • Next.js | • Git | • Copilot |
| • Vue.js | • Aws (Amplify, S3, Apprunner) | • Coda |
| • Module Federation | • Node | • Gemini |
| • Storybook | • Laravel 5/7 | • AI-assisted Development |
| • JavaScript | • Mysql | • Prompt Engineering |
| • TypeScript | • Postgres | |
| • CMS | | |

Languages

- Spanish (native - C2)
- English (advanced- B2)

Career History

Globant, Remote, Colombia

Web UI Developer - Anatomy Squad - British Airways

Dec. 2024 - Current

Responsibilities:

- Contributed to the implementation and maintenance of Anatomy version 4.8.1.
- Supported the migration and adoption of the upcoming Anatomy version 5.0 across applications.
- Collaborated with cross-functional teams to improve the consistency, scalability, and maintainability of the design system.

Web UI Developer - Service Level L3 - British Airways

Responsibilities:

- Resolved production issues and incidents, ensuring application stability and contributing to a 20% improvement in Datadog metrics.
- Developed and maintained reusable UI components, hooks, and shared capabilities within the Anatomy Design System.
- Leveraged AI-assisted development tools (GitHub Copilot, Coda, and Gemini) to accelerate root cause analysis, generate debugging hypotheses, improve incident documentation, and support faster production issue resolution while monitoring application health through Datadog.

Tools/Technologies: **Next.js**, **TypeScript**, **Design Components**, **Scrum**, **Storybook**, **Aws**, **Datadog**, **AI-assited**

Self-employed, Remote, Colombia

Freelance	Jun. 2024 – Nov. 2024
- MHA - Monitoreo Hemodinámico Ambulatorio	
Responsibilities:	
• Develop a private site for Sycor from scratch to read results from cardiologic machines like Custo-300, Custo-310, and MobiloGraph. • Create a monolithic modular project using a BFF architecture with React, TypeScript, Node, and MySQL. • Ensured application quality by implementing automated tests with Jest. Manage different branches using Git Flow and release the application using Amplify and AppRunner.	
Tools/Technologies: React, TypeScript, Node, Aws, Mysql.	
	Aug. 2024 – Oct. 2024
- Helitours	
Responsibilities:	
• Translated customer requirements and UI designs into reusable WordPress components and pages using PHP, CSS, and JavaScript. • Working closely with the client, facilitating meetings, and sharing new features with the customer.	
Tools/Technologies: Wordpress, Css, Php.	
	Jan. 2024 – Aug. 2024
- Medellin Joven	
Responsibilities:	
• Create new components and upgrade existing ones using Angular and TypeScript. • Improved the database structure and optimized development workflows across local and development environments using PostgreSQL and Node.js. • Implement agile methodologies with the purpose to optimize the organization of the project	
Tools/Technologies: Angular, Postgres, Node, TypeScript.	
VASS, Remote, Colombia	
V2 Developer	Ago. 2022 - Jan. 2024
Responsibilities:	
• Collaborate with international teams (product managers, designers, and backend engineers) to execute functionality of designs. • Developed a banking compliance platform using Vue.js, TypeScript, Styled Components, and Modyo CMS while collaborating with international product managers, designers, and backend engineers.	
Tools/Technologies: Vue.js, TypeScript, Scrum, Storybook, Jest, Modyo CMS	
Dolphin Ingeniería, Remote, Colombia	
Web Developer	Mar. 2021 - Jun. 2021
Responsibilities:	
• Developed new features, resolved production bugs, and maintained the Kairos web application using .NET and modern frontend technologies. • Development of web apps, using .Net, Sql, Aws, Javascript, Typescript, Scss and HTML	
Tools/Technologies: .Net, Sql, Aws, Javascript, Typescript	
Qoopa, Remote, Colombia	
Website Developer	Dec. 2019 - Mar. 2021
Responsibilities:	
• Create new components and upgrade existing ones for the company's custom UI library using React Native, Vue and Styled Components. • Built interactive web applications and internal systems using Vue, React Native, TypeScript, Laravel, and Node.js.	
Tools/Technologies: React Native, Vue, TypeScript, Laravel, Node	
Grupo Soul, Bogotá, Colombia	
Internship	Apr. 2019 - Nov. 2019

Responsibilities:

- Developed web pages using **Html, CSS, Bootstrap 4 , JavaScript, JQuery, Php** and added asynchronous features using **AJAX**.
- Solve bugs and implement new features on the website.

Tools/Technologies: **Bootstrap 4 , JavaScript, JQuery, Php**

Conex Travel, Bogota, Colombia

Web Developer

Oct. 2017 – Dec. 2018

Responsibilities:

- Develop a responsive user interface for a web application with front-end technologies **Html , Css (Bootstrap) , Javascript, React** and back-end technologies **Php**
- Optimized React projects to reduce file sizes and improve load times by 20%.

Tools/Technologies: **React, Php, Bootstrap, Html, Css, Git**

Education

Universidad Internacional de La Rioja, Bogotá, Colombia

Jan. 2024 – Currently

B.S. Software Engineering (Final requirements completed; awaiting Saber Pro examination and degree issuance)

Servicio Nacional de Aprendizaje, Bogotá, Colombia

Apr. 2020 – Jul 2022

AD, Associate's Degree Technologist Analysis of Information Systems, Computer Science
